

Workplace Fatalities

6/10/99 Crushed

A 55-year old, crane operator, was killed when the bridge crane he was operating collapsed and crushed him.

The victim was operating the crane in a large manufacturing facility when the crane collapsed, dropping the cab he was in 60 feet to the ground.

Questions to ask?

- Do you regularly inspect your equipment for damage or wear?
- Have your workers had an assessment of their operating skills?
- Do you ensure your operators lift within the capacity of the equipment?
